Evaluation test case 4:

The screenshot displays a REST client interface with the following details:

- Method:** POST
- URL:** http://127.0.0.1:3333/db/aggregate
- Send Button:** A blue button labeled "Send".
- Tabs:** Params, Auth, Headers (10), Body (selected), Scripts, Settings, Cookies.
- Body Format:** raw (selected), JSON.
- Request Body:**

```
5 { "$match": { "last_active_days": { "$lte": 60 } } },
6 { "$project": { "name": 1, "email": 1 } }
7 ]
8 }
```
- Response Status:** 200 OK (highlighted in green), 17 ms, 258 B.
- Response Body:** JSON format, showing a single document:

```
1 [
2   {
3     "_id": {
4       "$oid": "694a780c85ba8d751b627fa4"
5     },
6     "email": "amit@example.com",
7     "name": "Amit Sharma"
8   }
9 ]
```
- Tools:** Beautify, Schema, Preview, Visualize, and various utility icons (refresh, expand, search, copy, link) are visible.

Evaluation test case 5:

The screenshot displays a REST client interface with a POST request to `http://127.0.0.1:3333/db/query`. The request body is a JSON object with the following structure:

```
1 {
2   "collection": "chat_logs",
3   "filter": { "user_id": "USR001" },
4   "sort": { "timestamp": -1 },
5   "limit": 5
6 }
```

The response is a 200 OK status with a 16 ms latency and 503 B of data. The response body is a JSON array containing four chat log entries:

```
1 [
2   {
3     "_id": {
4       "$oid": "694a780cb80c7acb9d38c67a"
5     },
6     "message": "Hi",
7     "user_id": "USR001"
8   },
9   {
10    "_id": {
11      "$oid": "694a780cb80c7acb9d38c67b"
12    },
13    "message": "I need help",
14    "user_id": "USR001"
15  },
16  {
17    "_id": {
18      "$oid": "694a780cb80c7acb9d38c67c"
19    },
20    "message": "Order status?",
21    "user_id": "USR001"
22  },
23  {
24    "_id": {
25      "$oid": "694a780cb80c7acb9d38c67d"
26    },
27    "message": "Thanks",
28    "user_id": "USR001"
29  }
30 ]
```

Evaluation test case 6:

The screenshot displays a REST client interface with a dark theme. At the top, a **POST** method is selected for the URL `http://127.0.0.1:3333/db/insert`, with a **Send** button to the right. Below the URL bar, tabs for **Params**, **Auth**, **Headers (10)**, **Body** (selected), **Scripts**, and **Settings** are visible, along with a **Cookies** link on the right. The **Body** tab shows the **Request Body** in **JSON** format. The request body is a JSON object with the following structure:

```
1  {
2    "collection": "insurance_requests",
3    "data": {
4      "request_id": "INS_TEST_29",
5      "client_name": "Aishwarya Pirankar",
6      "type": "Health",
7      "status": "Submitted"
8    }
9  }
```

Below the request body, the **Response** section shows a **200 OK** status, a response time of **28 ms**, and a size of **207 B**. The response body is also in **JSON** format and contains the following structure:

```
1  {
2    "inserted_id": "694aa489114749000946f76b"
3  }
```

The interface includes various utility buttons such as **Beautify**, **Schema**, **Preview**, **Visualize**, and icons for refreshing, undo, redo, and search.

Evaluation test case 7:

The screenshot displays a REST client interface with the following details:

- Method:** POST
- URL:** http://127.0.0.1:3333/db/update
- Send Button:** A blue button labeled "Send".
- Tabs:** Params, Auth, Headers (10), Body (selected), Scripts, Settings, Cookies.
- Body Format:** raw (selected), JSON.
- Request Body:**

```
1 {"collection": "tickets", "filter": {"ticket_id":  
    "TCKT1001"}, "update": {"$set": {"subject":  
    "New"}}}}
```
- Response Status:** 200 OK (highlighted in green), 13 ms, 218 B.
- Response Body:**

```
1 {  
2   "reason": "Update blocked: Ticket is already Closed"  
3 }
```
